GOKULAKUMAR S

Basavanagudi, Bangalore | 9944351752 | gokulakumar2005@gmail.com | linkedin.com/in/gokulakumar-s | github.com/Gokulakumar2005

PROFESSIONAL SUMMARY

- MERN Stack Developer with hands-on experience building scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- Skilled in developing RESTful APIs, implementing JWT authentication, and managing application state with Redux.
- Experienced in building real-time features using Socket.IO and deploying production-ready applications.
- Proficient in integrating third-party services and following best practices in software development.
- Passionate about creating efficient, secure, and user-friendly web solutions while continuously learning modern technologies.
- Eager to contribute strong problem-solving skills and full-stack development expertise to innovative software teams.

TECHNICAL SKILLS

Languages: JavaScript (ES5, ES6+)

Frontend: React.js, Redux, Redux Thunk, HTML5, CSS3, React Router V6, React Drag and Drop, Leaflet

Backend: Node.js, Express.js, REST API, Socket.IO, JWT, bcrypt.js, node-cron

Database: MongoDB, Mongoose, Aggregation Pipeline

Tools & Libraries: Git, GitHub, VS Code, Postman, Axios, Joi, NodeMailer, Twilio

CORE COMPETENCIES

- Full-Stack Development
- RESTful API Design
- Authentication & Security
- Real-Time Systems
- Database Design

PROJECTS

Rental Parking — Full-Stack Web Application

- Developed a full-stack parking slot booking platform using React, Node.js, Express.js, and MongoDB, enabling users to search, book, and pay for slots by location and time.
- Implemented Redux and Redux Thunk for global state management; designed RESTful APIs for bookings, authentication, and slot management.
- Built role-based access control and secure authentication using JWT and bcrypt.js for password encryption.
- Integrated Socket.IO for real-time notifications and node-cron for background job scheduling to dynamically adjust pricing at peak hours.

Expenses Tracker — Full-Stack Web Application

- Built a full-stack expense tracking application with React and Node.js, allowing users to record, categorize, and monitor daily and monthly expenses.
- Designed an interactive dashboard using Recharts to visualize spending trends, category breakdowns, and monthly summaries.

GitHub: github.com/Gokulakumar2005/MERN-Expenses-App

Location Tracker — Full-Stack Web Application

- Developed a full-stack artist location tracking app using the Geolocation API to capture and update real-time coordinates.
- Enabled users to track artist locations and view upcoming event details on an interactive map interface.

EDUCATION

National College (Autonomous), Trichirappalli, TamilNadu

BSc Computer Science | 2025 | CGPA: 7.90

CERTIFICATIONS

MERN Stack Development – DCT Academy, Bangalore | Jul 2025 – Feb 2026 (7 Months) | Internship & Training Certificate

INTERESTS

Backend Development • Bike Riding • Video Games
