GOKULAKUMAR S

Full Stack Developer (MERN) | React.js & Node.js Specialist

Basavanagudi, Bangalore | 9944351752 | gokulakumar2005@gmail.com | linkedin.com/in/gokulakumar-s | github.com/Gokulakumar2005

PROFESSIONAL SUMMARY

• **MERN Stack Developer** with hands-on experience building 4+ scalable full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
• Skilled in developing RESTful APIs, implementing JWT-based authentication and role-based access control (RBAC), and managing application state with Redux, Redux Thunk, and Redux Toolkit.
• Experienced in building real-time features using **Socket.IO** (100+ concurrent users) and deploying production-ready applications on Render/Vercel.
• Trained in Agile development practices, Git-based version control, and API testing/documentation with Postman.

CORE COMPETENCIES

MERN Stack • React.js • Node.js • Express.js • MongoDB • REST API Design • JWT Authentication • Redux & Redux Toolkit • Socket.IO • Agile/Scrum • Git/GitHub • RBAC & API Security

TECHNICAL SKILLS

Languages: JavaScript (ES5, ES6+)
Frontend: React.js, Redux, Redux Thunk, Redux Toolkit, React Router v6, HTML5, CSS3, Tailwind CSS, React DnD, Leaflet, Responsive Design
Backend: Node.js, Express.js, REST API Design, Socket.IO, JWT, bcrypt.js, node-cron, NodeMailer, Twilio
Database: MongoDB, Mongoose, Aggregation Pipeline, Schema Design, Indexing
DevOps & Tools: Git, GitHub, Render, Vercel, Netlify, Postman, Axios, Joi
Practices: Agile/Scrum, Role-Based Access Control, API Security, Code Review, Responsive UI Design

EXPERIENCE

MERN Stack Developer Intern — DCT Academy, Bangalore Jul 2025 – Feb 2026

• Completed a 7-month intensive internship and training program, delivering 4 production-grade MERN stack projects end to end — implementing REST APIs, JWT authentication, and MongoDB schema design under mentor guidance.
• Collaborated in an Agile team environment (5-6 member sprints), participating in code reviews, sprint planning, and Git-based version control workflows.

PROJECTS

Rental Parking — Full-Stack Web Application | github.com/Gokulakumar2005/MERN-Rental-Parking-System
Tech Stack: React.js, Redux, Redux Thunk, Node.js, Express.js, MongoDB, Socket.IO, JWT, bcrypt.js, node-cron
• Developed a full-stack parking slot booking platform using React, Node.js, Express.js, and MongoDB, enabling users to search, book, and pay for slots across multiple locations and time slots.
• Implemented Redux and Redux Thunk for global state management across 10+ components; designed 15+ RESTful API endpoints for bookings, authentication, and slot management, with JWT/bcrypt.js-secured role-based access for Admin, Owner, and Customer roles.
• Integrated Socket.IO to push real-time booking notifications to 100+ concurrent users and used node-cron for automated background jobs, including dynamic peak-hour pricing.

Laptop Quotation System — Full-Stack Web Application | github.com/Gokulakumar2005/Assignment_1
Tech Stack: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt.js, Tailwind CSS
• Built a role-based (Admin, Sales Executive) laptop quotation management system enabling sales teams to assemble itemized price quotations for clients from a shared component catalog.
• Designed a component catalog covering 8 categories (Processor, RAM, Storage, Graphics Card, Display, Battery, Keyboard, OS) with admin-only CRUD operations and automatic price-history logging for audit tracking.
• Implemented secure JWT authentication and bcrypt.js password hashing with role-based middleware restricting component management to admin users.
• Designed REST APIs and Mongoose schemas linking sales executives, clients, itemized components, and computed totals; built the frontend with React 19, Redux Toolkit, and Tailwind CSS.

Expenses Tracker — Full-Stack Web Application | github.com/Gokulakumar2005/MERN-Expenses-App
Tech Stack: React.js, Node.js, Express.js, MongoDB, Recharts, REST API
• Built a full-stack expense tracking application with React and Node.js, enabling users to record, categorize, and monitor daily and monthly expenses across 8+ categories.
• Designed an interactive dashboard using Recharts, visualizing spending trends, category breakdowns, and monthly summaries to improve financial decision-making.

• Architected a normalized MongoDB schema and REST API layer to support fast filtering and aggregation of transaction history.

EDUCATION

• **BSc Computer Science** — National College (Autonomous), Tiruchirappalli, Tamil Nadu — 2025
• **CGPA: 7.90 / 10.0**

CERTIFICATIONS

• **MERN Stack Development** — DCT Academy, Bangalore (Internship & Training Certificate)
